## WT WINTECH blisters

For customers who prefer low-cost packaging, we offer lightweight packaging in blister plastic packaging in sizes M and S. The packaging is primarily intended for presentation on hanging shelves.

### Benefits

- production visible without the need to open the package
- perfect product protection against damage and pollution
- hinged system with locks for repeated opening
- attractive appearance of the packaging, suitable for presentation in hanging shelves
- our own blister shelves are available for comprehensive presentation at the point of sale
- reduction of personnel costs, an alternative to unit sales

S

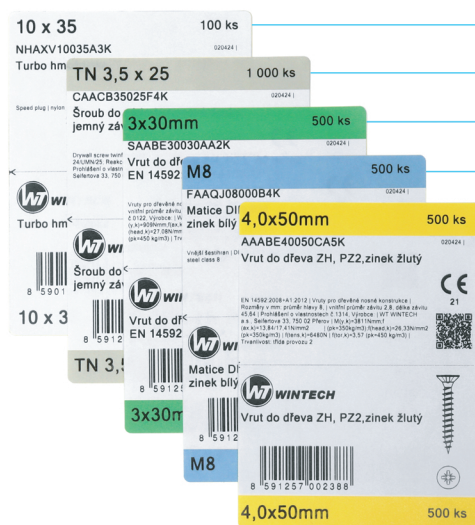

M

blister size	blister size (mm)	window size (mm)
M	90 x 165 x 30	70 x 125 x 20
S	90 x 165 x 30	70 x 65 x 20

## Labels WT WINTECH

Boxes and blisters are marked with a colored label on which we present all the important information about the product. On the label, you will find information about the product name, product code, size, surface treatment, number of pieces in the package, EAN code, QR code with a link to the product, product image, as well as legal information about European conformity and others. The color of the label serves as a visual distinction of the surface treatment of the fasteners.
